NEW & NOTEWORTHY — what dealers notice first

These are the tools dealers notice first — not a generic cash register with a coin label stuck on.

NEW · U.S. Sets in NumisNexus

Clad & silver proof, mint, and prestige sets by year range. Greysheet unit pricing, editable offers, multi-qty add — one matrix for the whole set line.

NEW · Inventory Quick Add

Bulk-add mint sets, proofs, ASE, commemoratives by product line. Greysheet pricing + titles + barcodes — minutes, not eBay-style listing time.

NEW · Team buys

Multiple phones on one purchase code. Shared cart, live updates, one finalize when the seller is ready — estates and busy show tables.

NEW · Web pickup at the register

Zelle, cash, and pickup orders flow into checkout. Confirm payment and hand off stock at the same counter.

NEW · Volume pricing (ExtraCoins)

Quantity breaks per listing — gold % over spot, silver \$/oz. Tier table on the product page; cart applies the right break.

NEW · Coin Dealer X wholesale

Post the same inventory for dealer-to-dealer sales. CDX revenue in SpotPro reports — no extra marketplace fee for active members.

GREYSHEET CATALOG LOOKUP (OPTIONAL)

Search greysheet by name, year, or GSD to identify the item and pre-fill description, type, and price suggestions. Enter quantity and acquisition cost for this receipt. Supplies and one-offs can skip this.

e.g. 999 Morgan, 999 A&E, or GSD 12345

ITEM TYPE

This is the most important choice on the form — it controls which pricing fields appear and how sell price is calculated. You can change it later, but picking the right one now saves rework.
